

I've been "baited and switched". When I signed up for high speed Internet with AT&T here in Pittsburgh, my monthly service charge was \$42.95 (charge is based on my owning the modem). This month I received a bill and the new service charge is \$57.95, a 35% increase! When I called I was told Comcast had bought AT&T and raised the rates. They said they would reduce the Internet rate back to the original \$42.95 only if I purchased cable TV (at \$12). I don't want cable TV. This is blackmail.
